## ICAR-National Research Centre for Integrated Pest Management, Pusa, New Delhi Weekly Status Report on Insects Pests & Diseases of Crops

Name of Institute: ICAR - INDIAN INSTITUTE OF SPICES RESEARCH, KOZHIKODE 673 012, KERALA

Date: 11.01.2018 - 17.01.2018

	Crop Stage	Location (with GPS)	Major Insect Pests		Major Plant Diseases		0.1 5	
Crop			Name (Scientific Name)	Status (Low, Medium & Severe)	Name (Scientific Name)	Status (Low, Mediu m & Severe)	Other Pests (Nematodes, Rat, etc.) (Scientific Name)	Pest Advisories
Black pepper	Nursery/ Harvesting	Idukki, Kozhikode, Wayanad (Kerala), Kodagu (Karnataka) ,Tamil Nadu	Scale insects (Protopulvinar ia longivalvata, Lepidosaphes piperis) (Field) Root mealybug (Planococcus sp.) (Field) Pollu beetle (Lanka ramkrishnai) (Field) Mealybug (Planococcus sp., Ferrisia virgata) (Nursery)	Medium  Medium  Low	Stunt disease (Cucumber mosaic virus, Piper yellow mottle virus) Slow decline (Meloidogyne incognita, Radopholus similis) Anthracnose (Colletotrichum spp.) (Nursery) Basal wilt (Sclerotium rolfsii) (Nursery) Viral infection (Nursery)	Low  Low  Low	Nematodes (Radopholus similis, Meloidogyn e incognita) (Nursery)	Field: Stunt disease Regular monitoring. Remove infected vines and destroy by burning or burying deep in soil Control the vector (mealy bugs) by drenching neem oil (0.5%).  Slow decline Remove and destroy severely affected vines. Apply neem cake @ 500g/vine and biocontrol agents like Pochonica chlamydosporia or Trichoderma harzianum @ 50 g/vine and metalaxyl-mancozeb (0.125%) may also be applied.  Scale insects Spray neem oil (0.5%), once infestation is noticed.  Root mealybug
			Scale insect	Low			-	Drench neem oil (0.5%), once

			(Protopulvinar ia longivalvata) (Nursery)					infestation is noticed.  Pollu beetle Spray neem oil (0.5%), once infestation is noticed.  Nursery: Anthracnose Spray Bordeaux mixture (1%).  Basal wilt Remove and destroy affected cuttings along with defoliated
								leaves.  After periodic sanitation, the cuttings should be drenched with carbendazim (0.2%) or Bordeaux mixture (1%).  Viral infections  Regular inspection and removal of infected plants. Regular monitoring for insects and spray with neem oil (0.5%) whenever infestation is noticed.  Mealy bug and scale insects  Spray neem oil (0.5%), once
								infestation is noticed.  Nematodes Apply Pochonia chlamydosporia @ 1g/bag.
Cardamom	Harvesting	Idukki, Wayanad (Kerala), Kodagu	Thrips (Sciothrips cardamomi) Shoot borer	Low Medium	Leaf blight (Colletotrichum spp.) Katte/Mosaic	Medium		Leaf blight Maintain optimum shade level by providing 40-60% filtered light. Katte/ Mosaic
		(Karnataka)	(Conogethes punctiferalis)		(Cardamom mosaic virus)		16.	Prompt inspection of plantation, detection and rouging of virus

			Chlorotic	Low	sources (infected plants/
			streak	LOW	1
			(Banana bract		volunteers) to reduce re-
12					infection. The removed plants
			mosaic virus)		may be burnt or buried deep in
					soil. Removal of natural hosts
					like Colocasia and Caladium to
					destroy breeding sites and check
-		1 1			population build-up of the vector.
					Chlorotic streak
				1.	Prompt inspection of plantation,
					detection and rouging of virus
					sources (infected plants/
					volunteers) to reduce re-
			*		infection. The removed plants
		1 1		5	may be burnt or buried deep in
					soil.
		1			Shoot borer
					Spray quinalphos (0.075%).
	_				Thrips
			P1		
					Spray quinalphos 25%EC
					(0.075%) after undertaking
					thrashing.

Vanilla	Bean	Karnataka	Premature	Medium	Premature yellowing and bean
	maturing/		yellowing and		shedding
	Harvesting		bean shedding		Provide 50% shade in the
			(Colletotrichum		plantation.
			vanillae)		Spray carbendazim – mancozeb
			Root and stem	Low	(0.25%) at $15 - 20$ days interval.
			rot		Root and stem rot
	- K		(Fusarium		Soil drenching with copper
			oxysporum f.sp.		oxychloride @ 0.25% followed
			vanillae)		by spray with carbendazim
			Viral diseases	Low	(0.25%) at monthly interval.
			(Bean common		Viral diseases
			mosaic virus,		Regular inspection and removal
			Bean yellow		of infected plants. The removed
			mosaic virus,		plants may be burnt or buried
			Cucumber		deep in soil. Control of vector
			mosaic virus,		(aphids) may be undertaken by
			Cymbidium		spraying neem oil (0.5%).
			mosaic virus)
