Subject:- Study Tour- on "South East Asian Models of Infrastructure Development "Singapore, Malaysia & Thailand.

Dear Sir/Madam,

National Council for Training & Social Research (NCTSR), Established by the Government of National Capital Territory Of Delhi, Department of Labour, New Delhi, serves as the apex body and representative of the various segments of Indian Industry with the mandate to provide impetus to collective interest in organized infrastructural development of the nation.

It gives me a great pleasure to inform you that after the many training programs conducted by National Council For Training & Social Research, for construction professionals, which are generally technical in nature.

We are now planning to conduct a specialized program on "South East Asian Models of Infrastructure Development" this program has been specially designed for the executives & decision makers, serving local, State & Central Govt. and the corporate sector. As you are aware that India is fast becoming a focal point for the world as a business & sports destination and there is a need for providing international level facilities not only in class-I cities but also other cities which have great potential to develop into international business centers.

The development of these cities would provide better job opportunities for the working class, better living conditions for the family, better recreational and amusement facilities. In short a better life style for its citizen. With a view to provide ideas, concepts and exposure to the decision makers, NCTSR is planning to organized Study Tour on "South East Asian models of Infrastructure facilities for Indian Cities" in the proposed cities as their infrastructure is considered as one among the best in the world. Date 16-23 May, 2016 (8 days) Course Fee INR ₹ 2,96,000/- (Two lakh Ninety six thousand rupees) per Participant (Detail Enclosed).

A brief note about the program is enclosed for your kind reference. We shall request you to convey to us your willingness to participate in this program, and also the nomination of the other officers from your organization, who may like to participate and get benefit.

Note:- You requested to send all Communication letters/Payments Demand Draft/Cheque through by Registered Post/Speed Post/E Mail & Fax only.

For more details visit our website www.NCTSR.Com and Contact at Mobile No +91-9911295435, Email:- E-mail: infonctsr@gmail.com, officenctsr@gmail.com, edc1977@gmail.com

Thanking You,

Yours Truly,

For National Council for Training & Social Research

Theme Note- Study Tour

**“South East Asian models of Infrastructure Facilities for Indian Cities”
Singapore, Malaysia & Thailand, Date:- 16th May, 2016 to 23rd May, 2016**

- National Council For Training & Social Research (NCTSR) plans to organize a study tour on “South East Asian Models of Infrastructure Facilities for Indian Cities” the areas of emphasis would be:-
1. Relevance of the South East Asia model for Indian Infrastructure Development
 2. Briefing and discussions on the sites that would be visited and points of interest.
 3. Discussion of expected outcome and takeaways
 4. Understanding International customs & behaviors
 5. Infrastructure Development models for cities
 6. Roads & Alternate Transport systems
 7. Water supply & drainage systems
 8. Inland Water Transport system

The site visits are planned to give first hand experience of the facilities providing services to the cities. These would include:-

1. Visit to Putrajaya planned city, the new capital of Malaysia
2. Visit to LRT systems, the LRT Authority, Kuala Lumpur
3. A visit to the Ministry of Urban Development – the Urban Redevelopment Authority
4. Ministry of Land Transport – The Land Transport Authority Gallery
5. Changi Water Reclamation Plant & Inland Water Transport system
6. Visit – BTS Skytrain, Transport Authority Bangkok.

PREAMBLE

Proper planning of limited available resources is difficult but not impossible. This is evident from the success behind Singapore’s beautiful skyline.

The republic nation of Singapore suffered severe crisis initially after it achieved independence in 1965. Soon, it embarked on a modernization spree that focused on establishment of a manufacturing industry, developing large public housing estates. Since independence, its economy has risen consistently. And within 25 years of its freedom, the country evolved into one of the world’s most prosperous nations, with a highly developed free market economy. The island nation of Singapore is perhaps one country which has scaled dizzying heights in a short span of time. Efficient Civil Services and able leadership have helped this vibrant and hi-tech nation catapult into one of the most lovely and successful places in the world.

Role Models: Singapore, Malaysia, Thailand

SINGAPORE

The Urban Redevelopment Authority (URA) is Singapore’s national land use planning authority, which has been instrumental in building quality real estate. URA draws up long-term strategic plans, as well as detailed local area plans, for physical development, and then coordinates to turn its plans to reality.

A professional way of managing and maintaining its real estate has given way to its continued economic progress and future development. **Space Utilization**

The space constraint seems to have come as a blessing in disguise for Singapore. The authorities focused on raising skyscrapers, huge in number. Instead of scattering its facilities, successful attempts have been made to house everything at one place and in one building, have also added to Singapore’s beauty. Land use is intensified by locating various facilities together instead of separately. For example, storm water collection ponds are located under road flyovers; and stack factories; train stations and bus stations are located over each other. Also there is a strive to constantly find ways to minimize constraints on development by using technology such as cleaner power station fuel to reduce buffer zones of polluted factories, or group such industries together and relocate them. **Roads & other transport systems**

For countries like India where roads hardly bear the weight of vehicles, authorities in charge of road development here should visit Singapore to see how roads can host world-class events like Formula One Grand Prix! The country’s world-class connectivity makes the place a favorite tourist destination. It has an advanced metro system. The Mass Rapid Transit (MRT) is a modern and economical way of

travel in Singapore. Ferry services, cable cars, mono rails, high-tech taxis, sightseeing flights etc. make a tourist's visit to Singapore a memorable one.

MALAYSIA

Malaysia's persistent drive to develop and upgrade its infrastructure has resulted in one of the most well developed infrastructure among the newly industrializing countries of Asia.

Peninsular Malaysia's network of well-maintained highways is a boon to industries. These highways link major growth centers to seaports and airports throughout the peninsula and provide an efficient means of transportation for goods, a Kuala Lumpur-Bangkok-Kuala Lumpur containerized service known as the Asian Rail Express (ARX). International trade, especially seaborne trade, has traditionally been the lifeblood of Malaysia, Port Klang and Port of Tanjung Pelepas among Asia. Malaysia's International Airports are ranked *number one for overall business passenger satisfaction* in an International Air Transport Association Survey. Industries in Malaysia are mainly located in over 200 industrial estates or parks and 14 Free Industrial Zones (FIZs) developed throughout the country. New sites, fully equipped with infrastructure facilities such as roads, electricity and water supplies, and telecommunications, are continuously being developed by state governments as well as private developers. The latest digital and fiber optics technology is being used to provide high quality telecommunication services at competitive prices.

THAILAND

Thailand government has continuously improved the nation's infrastructure, both in Bangkok and the provinces, tremendous strides have been made, especially in transportation projects. Bangkok's Skytrain was introduced years ago, making transportation more reliable in a city known for its traffic jams but after development of infrastructure including access to power and water, has helped Thailand fuel rapid economic growth during the past three decades and also helped facilitate international trade and improved the efficiency of everyday business activities. Thailand's water transportation system has long been an important part of the country's history and industries. With a coastline of 3,219 km and over 4,000 km of inland waterways, Thailand's water transportation and ports infrastructure are essential to its overall transportation and trade.

TOUR PLAN

Departure On Date 16th May, 2016 From New Delhi to Singapore by Air India Departure from New Delhi Tuesday, 16th May, 2016 at 00:05 hrs and Arrival Singapore Tuesday, 16th May, 2016 07:55 hrs . . .
