

**ARISoft Web Version**

Today the office automation venture at IISR reaches another milestone by extending this coveted service to the Experimental Farm and Krishi Vigyan Kendra, Peruvannamuzhi. The new web version of our office automation software ARISoft is also made operational from today onwards. The improved version provides you several additional features like access to your service book, pay slips, inward and outward 'tapal' besides a pleasant browsing experience. Many more modules and features will be added in the coming months. Kindly use the feedback form in the software for communicating your valuable suggestions and comments.
