

CIRCULAR

EBSCO Discovery Service (EDS) has been enabled in our campus. EDS is a federated search engine that helps you to search all the internet and library resources at one stroke. Kindly use the dedicated window in our library portal for accessing EDS. So gone are the days of doing multiple searching in resources like CABI, CeRA, online journals or library catalogue for collecting information on any topic. EDS offers a number of features to make your literature search a pleasure. We will be organizing an exclusive hands-on-session on EDS shortly.
